#### STANDARD GRADE ACCESS FLOORING LAMINATE TILE FROM FORMICA CORPORATION

Access Flooring Tile from formica Corporation is attractive, easy to keep clean, has excellent scuff and mar resistance, and the ability to withstand heavy loads. This heavy duty flooring tile is the perfect surface for environments in which good appearance, cleanliness, ease of maintenance and long wear are key considerations. It is an effective flooring solution for any area where maintaining a clean and dust-free environment is critical.

The product has low static generation and retention, which is particularly important for computer rooms, and is manufactured to meet or exceed the requirements of ANSI (American National Standard Institute) / NEMA (National Electrical Manufacturers Association) Publication LD3-2000 for high pressure decorative plastic laminate. Access Flooring Tile also complies with NFPA (National Fire Protection Association) standards. The installed flooring should be tested according to the procedure outlined in NFPA 99. Once installed, humidity, adhesives, panel paint system, and the overall continuity to the ground will affect the floor's electrical properties.

#### MEETS YOUR STRINGENT REQUIREMENTS AND ASKS LITTLE IN RETURN

Access flooring Tile from Formica Corporation combines good looks with your requirements for an anti-static decorative surface material that is exceptionally resistant to wear. Its attractive glare-free finish retains its aesthetic appeal and performance characteristics with minimal maintenance. With a little care, it will protect sensitive equipment installations from possible malfunctions due to dirt, moisture, or static build-up for a long time.

#### JUST FOLLOW THESE SIMPLE DO'S AND DON'TS

*DO use a dry mop or vacuum cleaner to remove dust.*

*DO use a lightly damp mop, warm water and mild soap or detergent for normal, periodic cleaning.*

*DO use a non-flammable organic solvent to spot clean stubborn stains.*

*Dissolve stains without rubbing or scrubbing, then blot dry.*

*DO NOT use wax, oil or any other coating. Wax will not damage the surface, it will adversely affect the static properties of the floor.*

*DO NOT use mops or other cleaning equipment items that have been used for other floors. The transfer of water-soluble wax particles or other foreign materials may cause static problems. A perfectly clean surface is the best insurance against static problems.*

*DO NOT use any form of abrasive powder, pad or steel wool to clean the floor. Abrasives are never necessary.*

*DO NOT subject floors to abuse from nails or other metals in footwear. During and after installation, care should be taken to protect floor surface from foreign materials e.g. wax, that can be tracked in from other areas.*

## A PRACTICAL SOLUTION

---

FOR MANY DEMANDING APPLICATIONS

Access Flooring Tile from Formica Corporation is an economical, flooring surface that has low static generation and retention. A practical solution for computer rooms, control rooms, clean rooms, general office buildings, hospital operating room – anyplace where cleanliness, easy maintenance and durability are valued.

Tough, yet attractive and simple to clean, Access Flooring Tile is an ideal flooring surface for high-traffic areas such as walkways and file rooms. It is an excellent choice for light manufacturing applications, as well, providing interior flexibility for rearranging equipment as requirements dictate.

A superior high pressure laminate floor tile, Access Flooring Tile is widely used by leading access floor manufacturers in the fabrication of floors for new buildings and renovations.

## SPECIFICATION INFORMATION

### SPECIFICATIONS

PRODUCT NAME: Access Flooring Tile

### PRODUCT DESCRIPTION

Access Flooring Tile from Formica Corporation is specially designed for access flooring systems where good appearance, durability and resistance to stain, indentation, and abrasion are required. It complies with requirements for low static generation and retention, and assures ease of maintenance.

### LIMITATIONS

Access Flooring Tile is not recommended for applications other than shop-fabricated access floors. Underlayments can be particle board, steel, aluminum or plywood. It is not recommended for exterior applications. Do not use in areas exposed to temperatures exceeding 275°F (135°C).

### COMPOSITION & MATERIALS

Several layers of phenolic resin-impregnated kraft paper filler stock, a layer of melamine-impregnated printed pattern paper assembled and consolidated at approximately 1,400 psi pressure and at temperature exceeding 275°F (135°C). The back of the sheet is sanded to permit bonding.

### SIZES

Industry standard is 600.075 mm x 600.075 mm (23.625" x 23.625") + 0.000 - 0.5 mm (.020")

Diagonal tolerance within .35 mm (0.015")

Other sizes available if required

Thicknesses: 1.587 mm (1/16") 3.175 mm (1/8")

Access Flooring Tile is guaranteed to meet these standards when ambient conditions are 45% - 55% RH and 65-75°F (19-24°C)

Finish: Suede (a minutely-grained texture having a 60° specular gloss level of 8)

### TECHNICAL DATA

Access Flooring Tile exceeds performance requirements of NEMA LD3-2000.

### SURFACE RESISTIVITY

When tested according to the procedure outlined in NFPA 99, Formica Access Flooring Tile has a maximum resistance of 20,000 Megohms measured between the laminate surface and an applicable ground reference.

Typical values: 11,000 - 12,000 Megohms

### INSTALLATION

FABRICATION DATA: Access Flooring Tile should be bonded to particle board, plywood or oil-free steel and aluminum access flooring sections with a moisture-resistant adhesive, under recommended bonding pressures and conditions. The temperature of the materials, surfacing core and adhesive, and the area in which the actual fabrication is to be done, should not be less than 65°F (19°C), with a relative humidity of not less than 35% and no more than 80%. All inside corners of cut outs in Formica® brand laminate should have a radius as large as possible, minimum 3.175 mm (1/8"), to prevent radial cracking. File the edges of the radius smooth and free of cracks and crazes.

METHODS: Assembly of components should be accomplished using approved labor, material, and equipment. The workmanship should conform to the Formica Corporation established standard practices, conditions, procedures, and recommendations.

### AVAILABILITY

Access Flooring Tile is normally produced to order, but some stocks are maintained to handle such requirements. Stock is also maintained by most floor manufacturers.

COST: Variable according to quantity and type.

### WARRANTY

Formica Corporation expressly warrants that its products are free of defects in materials and workmanship, are of merchantable quality and conform within accepted tolerance, to applicable manufacturing specifications.

Because Formica Corporation has no control over the applications to which its products may be put, the Company can not make any other warranties, expressed or implied, other than those set forth above.
